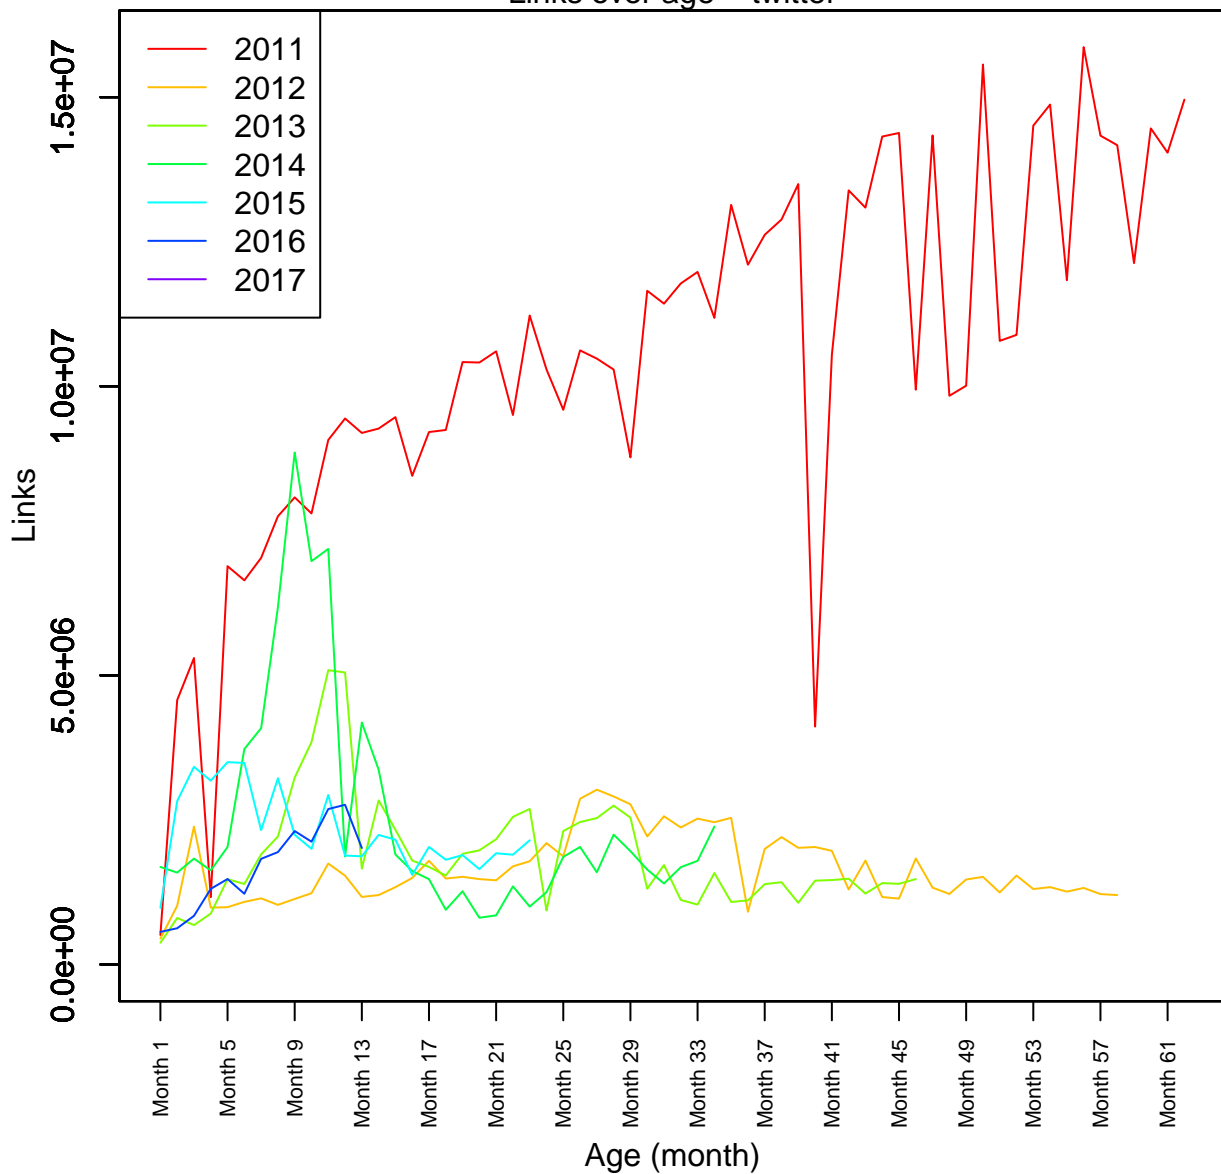

Figure 1: Percentage of children with a specific language impairment (SLI) by age (month) for the years 2008, 2010, 2011, 2012, 2014, 2015, 2016, and 2017. The graph shows that the percentage of children with SLI increases significantly with age, particularly for the year 2008, which shows a sharp rise to 100% by Month 5. The other years show much lower percentages, generally below 20%.
