

## HHI over age – reddit

The graph displays the age at first calving (in months) for different years from 2011 to 2017. The x-axis represents age in months (1 to 61), and the y-axis represents the number of cows (0 to 100). The graph shows that the age at first calving generally increases over time, with a significant peak around 33 months for the 2014 cohort.
